Accreditation Service

PLANNING SERVICE ■ SOFTWARE SOLUTION ■ TECHNICAL EXPERTISE ■ SPECIALIZED EQUIPMENT

Specialized in the production of secure ID cards, Aptika also offers a dedicated accreditation service designed for large-scale events. With proven know-how from sporting and corporate events, Aptika is able to combine its knowledge of software development and its experience on the ground in order to offer its clients a turnkey service centering on these four main points:

PLANNING SERVICE

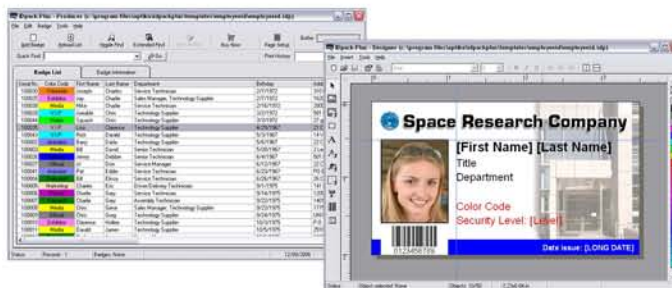

- Analysis and planning of needs
- Identification of access zones to be secured
- Definition of access rights and codes
- Selection of card format and design
- Synchronization of databases
- Integration of data into IDpack Plus
- Setting up of operational schedule
- Consulting and project management

SOFTWARE SOLUTION

Created by Aptika to satisfy the particular needs of accreditation, IDpack Plus software is designed for the production of secure ID cards. The software handles a variety of jobs together: the cards can be easily designed, external data imported, security elements added, photos captured in real time, and paper printout rapidly executed.

IDpack Plus features:

- Ease of use
- Unlimited card design possibilities
- Intuitive interface
- + 1000 Avery formats supported
- Real-time digital photo capture
- Importation of external data and images
- Unlimited card formats
- 14 levels of security
- High productivity
- 25 types of barcodes
- Local and network configuration

Stock #: PC720-PLUS

TECHNICAL EXPERTISE

Since 1999, our accreditation service has built its reputation on its consulting efforts, an attentive attitude toward clients, an ability to realistically evaluate client needs, and efficient project management, which includes respecting deadlines.

Aptika ensures technical support, training on the software, and on-site supervision of accreditation teams. Our specialists have developed a capacity for rapid problem solving in the face of complex situations and problems that may arise in relation to accreditation.

SPECIALIZED EQUIPMENT

Aptika offers its clients the possibility of renting all the material required for accreditation: PCs, central server, cameras, colour printers, paper cards and laminate pouches, professional laminators, barcode readers and other specialized equipment.

Our technical team also sees to delivery, on-site setup, PC configuration and network setup. After the event, crowd reports, various statistics and a CD-ROM containing all data and photos are available upon request.
